

The Industry Leader in Steer Axle Remanufacturing

5 Star Remanufacturing

Our thorough machining and welding processes on steer axles provide you with a remanufactured product that meets original OEM specifications.

steer axles

Remanufactured Steer Axles

Features & Benefits

- Preferred remanufacturing vendor for 5 major OEMs
- Time tested repair procedures
- Industry leading limited 1 year warranty, with unlimited hours
- All repairs are done to original OEM specs, so if you ever need to buy repair parts for one of our steer axles, the OEM parts will fit.
- Axles with steer cylinders: all cylinders are honed and repacked. All rods are rechromed as required, or replaced.
- Large inventory of reman axles in stock for both domestic and import liftrucks
- Minimal lead time required for steer axles built to order (3-4 days)
- Over 1000 cores available
- Steer axles are thoroughly tested to insure reliability and trouble-free installation
- Quick exchange = customer satisfaction = uptime

Items always replaced include:

King pins · King pin bearings · Center pin bearings · Tie rod ends
Seals · Thrust bearings · Thrust shims · Grease zerts.
